Neste 140mm Drain Kit Schematic

zuhnë

Plastic Shell
Outer body of the drain.

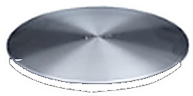

Steel Cup
Fixed inner body. Sits inside the plastic shell and cannot be removed once the drain is installed.

Trap with Clear Cup
The clear cup catches debris. Unscrew it to clear blockages.

Trimmable Drain Hose
Trim to length at a smooth band, then fit the stepped adapter. See the guide on the right.

Removable Pieces
Lift these out for cleaning. The steel cup stays in place.

2-Stage Strainer: separates waste

Drain Cover / Plug

Top Strainer

Strainer Basket

Hose Trimming & Adapter

A Trim Marks
Cut at the lower end of a smooth band, so the whole band stays on the hose. Leave at least 3 cm of smooth hose to push onto the adapter.

B Stepped Adapter
Push-fit. Use the ring that fits snugly. Suits wall and floor outlets and hard PVC piping.

Installation Notes

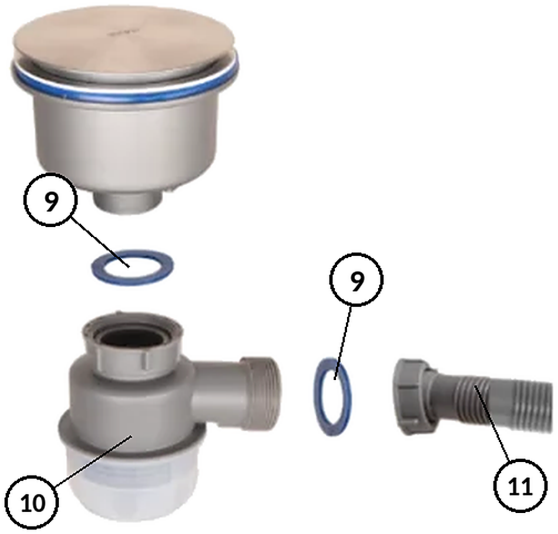

Trim the hose at a smooth band if needed, then push the adapter into the outlet.

The Neste drain can be attached to wall outlets, floor outlets and directly to hard PVC piping.
